ACKNOWLEDGEMENT

The compilation of data in a volume such as this depends very heavily upon the cooperation of a great number of people who represent public and private agencies throughout the State. In doing the 1979 update, we have received this cooperation in the fullest measure and we are grateful for all the contributions of statistical information and photographs from each of the following individuals, and from their Cabinet Secretaries and elected officials who set the tone for this cooperative effort.

FETAL AND INFANT MORTALITY RATES,
UNITED STATES, DELAWARE, AND SELECTED STATES: 1977

State	Fetal[1]	Infant[2]
UNITED STATES	9.9	14.1
Delaware	10.5	11.5
Maryland	10.7	14.4
Pennsylvania	25.8	13.9
New Jersey	11.5	14.4
District of Columbia	16.2	27.3
Virginia	12.7	15.7
West Virginia	10.9	14.5

---

[1] Fetal deaths - deaths of 20 or more weeks of gestation, except for Pennsylvania which is 16 or more weeks of gestation.
[2] Infant deaths - 365 days or less - per 1,000 live births.

Note: Fetal and infant mortality rates are based on in-state deaths of infants born to residents of each state.

EXAMPLE: Delaware number of fetal deaths = 86
Number of resident live births, 1977 = 8,134

$$\text{FETAL RATE} = \frac{86}{8{,}134 + 86} = 10.5$$

Table B-46

ESTIMATED ALCOHOLISM, BY SEX-TOTAL, 1970 AND 1975, THE UNITED STATES, DELAWARE, AND SURROUNDING STATES: 1970

[Population, 20 years old and over. An "alcoholic" is defined as one who is unable consistently to choose whether he shall drink or not, and who, if he drinks, is unable consistently to choose whether he shall stop or not. "Alcoholics with complications" are those who have developed bodily or mental disorders through prolonged excessive drinking. Data are rough approximations derived by the original Jellinek formula. In the early 1940's, E. M. Jellinek proposed a formula for estimating the number of "alcoholics-with-complications" from statistics on liver cirrhosis deaths. To arrive at the total number of alcoholics (those with and without complications) the results of the formula were multiplied by a factor, R, the value of which was thought to be 4. Subsequently it appeared that the value of R should have been 5. The formula was applicable to the years 1940-1945 but is thought not to have worked reliably after 1945. However, if the rate of the 1940-1945 period has remained substantially the same, then, with a further necessary correction of R to 5.3, applying the 1945 rates of alcoholism to the 1970 and 1975 population yields the number of alcoholics. The formula may be less reliable with smaller populations.

*No grade level and sex dropout data available for these years.

[1] This table shows that, for both males and females, the greatest number of dropouts occurs during the tenth grade, and that the number of male dropouts is consistently greater than female dropouts across all grade levels.

[2] This table shows that almost half of the dropouts (45.5 percent) at least began their eleventh grade year in school, and 541 of those 1,248 students did not leave school until sometime during their senior year. Only 2.5 percent of the dropout population did not remain in school long enough to enter grade nine. The table also shows that for both males and females, the greatest number of dropouts occurs during the tenth grade, and that the number of male dropouts is consistently greater than female dropouts across all grade levels.

[1] 53.5 percent of the students who dropped out of grades 7 and 8 (23 of 43) were at least 16 years old and 72.1 percent of these students (31 of 43) were at least 15 years old. Of the high school students who dropped out, 89.9 percent of the grade 9 students (462 of 514), 95.9 percent of the grade 10 students (603 of 629), 99.2 percent of the grade 11 students (656 of 660), and 100 percent of the grade 12 students (471 of 471) were at least 16 years old and could legally withdraw from school attendance. Except for grade 12, a large portion of the students who dropped out were at least a year older than the average age of students in that grade level.

[2] 65 percent of the students who dropped out of grades 7 and 8 (13 of 20) were at least 16 years old. As would be expected, this table indicates that the age of most dropouts is greater than the average age of students in their grade level. However, 18 percent of the 11th grade dropouts (115 of 643) were the same age as their peers indicating that they had always been successfully advanced to the next higher grade level.

[3] 43 percent of the students who dropped out of grades seven and eight (30 of 70) were at least sixteen years old. As would be expected, this table indicates that the age of most dropouts is greater than the average age of students in their grade level. However, 26 percent of the eleventh grade dropouts (187 of 707) were the same age as their peers, indicating that they always had been successfully advanced to the next higher grade level.

[1] These pupils are not included in the total because they have already been counted in their home school district. The number listed is equivalent to the number of full-day pupils attending this school or district. This number was computed by multiplying 1/2 times the number of students attending the school or district since these students attend for only half a school day.

[2] This amount represents a cost per pupil equivalent to the student in attendance for a full school day. It is computed by multiplying 2 times the actual cost for the one-half day program in the school district.

[3] The addition of the expenditure of $23,738,194 for Insurance, Social Security, Pensions and other administered costs by the State Treasurer increased the statewide amount based on ADM to $1,908 and based on ADA to $2,072.

[4] This amount represents a per pupil cost based on the ADM and ADA figures only in those districts having a local bonded debt.

[5] The addition of the expenditure of $25,578,019 for Insurance, Social Security, Pensions and other administered costs by the State Treasurer increased the statewide amount based on ADM to $2,176 and based on ADA to $2,384.

ADA - Average Daily Attendance.

ADM - Average Daily Membership.

[1] Data for municipalities, and the local governments totals which include municipal data, are estimates subject to sampling variation; data for counties, (boroughs, parishes) are based on a canvass of all county governments and therefore are not subject to sampling variation.

[2] The relation of criminal justice total expenditure to total general expenditure is based on data for general purpose governments only and does not include data for State-operated liquor stores, independent school districts or special districts.

[3] For each State, and the States-local total, the expenditure figures shown on the "Local, total" line and the combined State-local total line (the data shown opposite the names of the individual States) exclude duplicative intergovernmental expenditure amounts. This was done to avoid the artificial inflation which would result if an intergovernmental expenditure amount for one government is tabulated and then counted again when the recipient government(s) ultimately expend(s) that amount.

- Represents zero or rounds to zero.

Table D-13

EMPLOYMENT AND PAYROLL FOR CRIMINAL JUSTICE ACTIVITIES, BY STATE AND LEVEL OF GOVERNMENT, STATES, TOTAL, AND DELAWARE: OCTOBER, 1971-OCTOBER, 1975

[Dollars amounts in thousands.]

Note: The survey of expenditure and employment is conducted annually through the joint efforts of the Law Enforcement Assistance Administration and the U. S. Bureau of the Census. In general, six categories of activity are covered; police protection, judicial, legal services and prosecution, public defense, corrections, and other. Data are also collected for each of three levels of government; Federal, State, and local. Local government coverage includes all county governments, all municipalities having a 1970 population of 10,000 or more, and a sample of the remaining cities and townships under 10,000 population. The survey panel was comprised, therefore, of the Federal Government, the 50 State governments, and 9,045 local governments (3,043 county governments; 4,305 municipalities; and 1,697 townships).

Because all State and county governments were surveyed, data relating to them are not subject to sampling error (i.e., variations that might result if a different sample were used). However, data reported for local governmente are estimates that are subject to sampling error. Local government estimates are accurate (at the 95 percent level of confidence) to within 1 percent of the totals that would have been expected if all local governments were surveyed.[2] Field compilation and mail canvass methods were used to obtain the data reported. Expenditure data are generally for the fiscal year ending June 30, 1975, for the Federal government and all States, except New York (March 31, 1975), Texas (August 31, 1975) and Alabama (Sept. 30, 1975). Employment data are for October 1975, for all levels of government.

Assumptions

1. Base year 1970 employment by residence data.
2. Actual National Sector growth rates for 1970-1971, 1971-1972 and 1972-1973 and BLS used to obtain Delaware and counties employment by residence data by industry for a base year 1973.
3. Delaware and counties sectors assumed to grow a rate equal to adjusted projected national sector growth rate for 1973-1980 and 1980-1985.
4. Sector growth rates for 1985-1990 and 1990-1995 equal to projected national sector rate for 1985-1990.
5. Adjustment factor for each sector, for each county applied to projected national growth rate for 1973-1980.
6. Military population maintained throughout 1973-1995 at strength of 1973.
7. Unemployment rates projected at 8.5 percent in 1975 and declining to 4.0 percent by 1985.
8. National Labor Force expected to increase nationally 1.5 million more by 1980, and 2 million more by 1985 than previously assumed.
9. Fertility rate of series E.

Assumptions

1. Base year 1973 employment data derived from BEA (unpublished) "covered" employment augmented by non-covered employment and including FARM and NONFARM proprietors.
2. Employed includes multiple job holders, nonresident employees, persons under 16 and military.
3. Nonfarm proprietors distributed to sectors in Delaware and three counties as they are nationally in 1973.
4. Sector growth rates for Delaware and counties equal to national sector rates projected by BLS for 1973-1980 and 1980-1985.
5. Sector growth rates for 1985-1990 and 1990-1995 equal to national sector rate for 1985-1990.
6. Military population maintained throughout 1973-1995 at strength of 1973.
7. Unemployment rates projected at 8.5 percent in 1975 and to decline to 4.0 percent by 1985.
8. National Labor Force expected to increase nationally 1.5 million by 1980, and 2 million by 1985.
9. Fertility rate of series E.

[1] The data for this table were obtained from the second quarter Current Employment Statistics (CES) Reports-Delaware. Total non-manufacturing employment represents the sum of only those industries within the scope of the OES 1978 Survey.

[2] Occupational estimates in this table generally have been published at the survey code level which is a combination of several industries. For example, Survey Code 750 covers Automotive Repair, Services, and Garages (SIC 75) and includes the following three-digit industries as classified by the Standard Industrial Classification (SIC) Manual - 1972: Automotive Rental and Leasing, Without Drivers (SIC 751); Automobile Parking (SIC 752); Automotive Repair Shops (SIC 753); Automotive Services, Except Repair (SIC 754).
Estimates are produced at the three-digit SIC level and are then rolled up to the survey code level. Data of occupational estimates at the three-digit level are available upon request from the Delaware Department of Labor.

* - Less than $500,000.

D - Not shown to avoid disclosure of confidential information; data are included in totals.

[1] Consists of wage and salary disbursements, other labor income, and proprietors' income.

[2] Includes the capital consumption adjustment for non-farm proprietors.

[3] Includes wages and salaries of U.S. residents working for international organizations.

[4] Under the 1972 SIC code ordnance was reclassified to four 2-digit industries: fabricated metal products, electric and electronic equipment, transportation equipment and instruments and related products.

[5] Adjustment for border workers: income of U.S. residents working across U.S. borders less income of foreign residents working in the U.S.

[6] Includes the capital consumption adjustment for rental income of persons.

[7] Because of an error in non-farm proprietors' income which could not be corrected in time for publication, the 1978 derivation of personal income by place of residence will not add to total personal income. A corrected table will be available upon request to the Regional Economic Measurement Division.

NOTE: Estimates for years prior to 1975 are based on the 1967 Standard Industrial Classification (SIC). Estimates for 1975-1978 are based on the 1972 SIC.

[2] Costs for the BLS budgets for a four-person family from which estimates for other family types are derived.

[3] Estimated from the equivalence scale value of 51 percent of the base (four-person) family. Costs based on detailed BLS budgets for a retired couple may differ slightly from estimates obtained by the scale values.

[4] Estimated from the equivalence scale value of 28 percent of the base (four-person) family. May differ slightly from estimates obtained by applying a ratio of 55 percent to the BLS budget for a Retired Couple.

[1] This is the standard deviation of the estimate expressed as a percentage of the estimate. These percentages, when added to and subtracted from the estimates in columns 1 through 9 to which they refer, give the range within which approximately two out of three such estimates from similar samples would be expected to fall.

FOUNDATIONS-NUMBER AND FINANCES, THE UNITED STATES, DELAWARE AND SURROUNDING STATES

[Figures are for latest year reported by foundations, usually 1977 or 1978. A foundation may be defined as a non-governmental, nonprofit organization, with funds and programs managed by its own trustees or directors, and established to maintain or aid social, educational, charitable, religious, or other activities serving the common welfare, primarily by making grants. Excludes organizations which make general appeals to the public for funds, act as trade associations for industrial or other special groups, are restricted by charter solely to aiding one or several named institutions, or which are captive trusts, within colleges, churches, or other organizations, or are small-defined as having neither assets of $1,000,000 nor making grants of at least $100,000 in the latest year of record. There were approximately 19,000 small grant-making foundations.]

[1] In Annual Survey of Manufactures (ASM) years, data are estimates based on a representative sample of establishments canvassed annually and may differ from results of a complete canvass of all establishments. ASM publication shows percentage standard errors. For data prior to 1963, see 1963 Census of Manufactures, Volume III, Table 2 of State chapter.

Note: Payroll and shipments data for small establishments (typically single-unit companies with less than 20 employees [cutoff varied by industry]) were obtained from administrative records of other government agencies instead of from census report forms. These data were then used in conjunction with industry averages to estimate the other items in the table for these small establishments. This technique was also used for a few other establishments whose reports were not received at time data were tabulated.

Note: Payroll and shipments data for small establishments (typically single-unit companies with less than 20 employees [cutoff varied by industry]) were obtained from administrative records of other government agencies instead of from census report forms. These data were then used in conjunction with industry averages to estimate the other items in the table for these small establishments. This technique was also used for a few other establishments whose reports were not received at time data were tabulated.

- Represents zero.
NA - Not Available.
D - Withheld to avoid disclosing figures for individual companies.

[1] Statistics for some industry groups and industries have been withheld to avod disclosing operations of individual companies and to permit further verification of data for smaller industries. Statistics for industry groups shown include data for all component industries, regardless of whether data are shown for individual industries in group. Data for all industries with 150 or more manufacturing employees will be included in final publication if figures do not disclose operations of individual companies. For 1972 the following employee time ranges substitute for actual figures withheld to avoid disclosure: AA, 150 to 249 employees; BB, 250 to 499 employees; CC, 500 to 999 employees; EE, 1,000 to 2,499 employees; FF, 2,500 employees or more.
[2] Aggregate of cost of materials and value of shipments figures for industry groups (2- and 3- digit), and for all manufacturing industries includes extensive duplication, since products of some industries are used as materials by others.
[3] Including central administrative offices and auxiliaries.

*This data has associated standard errors exceeding 15 percent, thus these estimates may be of limited reliability. However, they may be combined with other totals into broader aggregates which are of acceptable reliability.

[1] State and standard metropolitan statistical area totals include the estimates for all component industry groups or counties, regardless of whether or not separate data are shown for the individual industry group or counties.

[2] A description of the standard error of estimate is given in the Introduction of the source text under "Qualifications of the Data." The percentage standard errors A, F and I are the approximate standard errors of the estimates of level.

[3] The total value of shipments and cost of materials data for industry groups (2 and 3 digit) include extensive duplication arising from shipments between establishments in the same industry classification.

(X) - Not applicable.
(D) - Withheld to avoid disclosing figures for individual companies.

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent E2--20 to 29 percent

NA - Not Available.

D - Data withheld to avoid disclosing figures for individual companies.

Z - Less than half of the unit of measurement shown (under 50 thousand dollars or man-hours; under 50 employees.)

***Remarks: 1. All figures shown in the above tables were State maintained roads and streets as of December 31, 1978.

2. The increase of State maintained mileage was largely due to Senate Bill 313, effective July 1, 1975 and terminated June 30, 1978, amending Delaware's public road acceptance standards. A total of 86.3 miles of suburban streets have been taken into State jurisdiction by this Act during its 3-year period.

[1] Includes trips to destinations outside the United States.

[2] Nights spent in State.

[3] Includes total nights spent on trip, not just nights spent in State.

[4] Apparent inconsistency between figure for household trips and that for person-trips is because the two kinds of trips were weighted independently.

(Z) - Not applicable.

[1] Nonsurfaced mileage includes primitive, unimproved, and graded and drained roads.

[2] Surface types indicated by symbols in these columns are as follows: D, soil-surfaced; E, slag, gravel, or stone; F, bituminous surface treated; G-1, mixed bituminous; and H-1, bituminous penetration having a combined thickness of surface and base less than 7 inches and/or a low load-bearing capacity; G-2, mixed bituminous; and H-2, bituminous penetration having a combined thickness of surface and base 7 inches or more and/or a high load-bearing capacity with or without Portland cement concrete base; I, bituminous concrete and sheet asphalt with or without Portland cement concrete base; and J, Portland cement concrete with or without bituminous wearing surface less than one inch in compacted thickness. Segregation of G and H surfaces according to thickness and loadbearing capacity is not uniform for all states. Where no segregation was reported for them, the mileage was classified as G-1 and H-1.

[1] This table is based on reports of motor fuel passing through state taxing channels. In order to make the data uniform and complete, numerous estimates and approximations were made by the Federal Highway Administration. The resulting gallonages differ in many instances from the unadjusted data.

[2] Amounts of highway and nonhighway use were determined principally by analysis of data on taxed gallons, exemptions, and refunds. Estimates for states that report no exemptions or refunds for nonhighway use were based on data for states having similar characteristics. The highway fuel consumption data are reliable for most states, but in a few there are indications that refund claims were excessive and that gasoline allegedly used for nonhighway purposes is actually used on the highways. To the extent that this occurs, the highway consumption of motor fuel is understated.

[3] The figures in this column were obtained by dividing total highway fuel consumption by total motor vehicle registrations excluding motorcycles.

[4] Some states make a flat percentage allowance for losses in storage and handling and others allow for actual losses not to exceed a specified percentage. Still others permit distributors to claim stock losses in reconciliations of inventories, thus exempting the lost gallonage from taxation. Losses by destruction, where reported separately, are also included in this column. The maximum allowance used in the analysis to cover losses in storage and handling was one percent.

[5] Does not include special fuels (fuels other than gasoline) used for nonhighway purposes.

[1] This table includes data on all motor-fuels subject to state motor-fuel taxes, except special fuels (fuels other than gasoline) used for nonhighway purposes. It is not intended to reflect the amount of fuel used on highways.

[2] Export sales and other amounts not consumed as motor fuel in state have been excluded wherever possible.

[3] Totals may not add due to rounding.

[4] Includes federal use, other public use, certain transit use, nonhighway use where initial exemptions rather than refunds are made, and allowances for evaporation and other losses. The maximum allowance used in the analysis to cover losses in storage and handling was one percent.

[5] Where two tax rates are shown for a state, the first applies to diesel fuel and the second to liquified petroleum gases. Some states impose additional registration fees or mileage taxes on vehicles using special fuels. Such additional fees in Vermont and Wyoming are in lieu of gallonage taxes.

[6] In some states, fuel used for specific purposes is taxed or refunded at rates other than the prevailing rates shown. In the case of aviation fuel, only aviation gasoline is included.

[7] Tax rate changes in 1978 were as follows: Delaware, 11 to 9 cents, September 1; Iowa, 7 to 8.5 cents (gasoline), 8 to 10 cents (diesel), July 1; Utah, 7 to 9 cents, July 1; West Virginia, 8.5 to 10.5 cents, June 1.

[8] Weighted average tax rate. The weighted average rate for all motor fuel was 7.83 cents per gallon.

[9] Trucks or combinations with more than two axles pay an 11-cent tax in Virginia.

[1] Figures are lengths of general outline of seacoast. Measurements were made with a unit measure of 30 minutes of latitude on charts as near the scale of 1:1,200,000 as possible. Coastline of sounds and bays is included to a point where they narrow to width of unit measure, and includes the distance across at such point.

[2] Figures obtained in 1939-1940 with a recording instrument on the largest-scale charts and maps then available. Shoreline of outer coast, offshore islands, sounds, bays, rivers, and creeks is included to the head of tidewater or to a point where tidal waters narrow to a width of 100 feet.

[1] Airport data, except average percentage of sunshine data for Wilmington was not available, therefore, figures are for a nearby station.

[2] A unit based upon temperature difference and time, used in estimate fuel consumption and specifying nominal heating load in winter. For any time, used in estimating fuel consumption and specifying nominal heating load in winter. For any one day, when the mean temperature is less than 65° F., there exist as many degree days as there are fahrenheit (F.) degree differences between the average temperature for the day and 65°.

[3] For period of record through 1977.

[4] Based on standard 30-year period, 1941 through 1970.

▨ "Water Quality Limited" classification means that additional measures other than effluent limitations must be applied to attain water quality standard e.g. waste load allocation.
☐ "Effluent Limited" classification means that segment can attain water quality standards by application of effluent limitation on point sources.

[1] This figure represents the acreage of the roadside rest area located just north of Smyrna. Twenty-six acres of this site have been developed.

[2] The total acreage is higher because the State Highway Department owns 38 wayside areas for which acreage data was not collected.

[3] The total figure as well as county figures are higher because several towns own ballfields, playground facilities and picnic tables for which acreage data is not readily available.

*Figures for 1975 and later reflect a definition change. The "old definition" of a farm, shown in parentheses for 1975 and later, (where applicable), included places of ten or more acres that had annual sales of agricultural products of $50.00 or more and places of less than ten acres that had sales of $250 or more.

Under the "new definition," a farm is defined as a place that had annual sales of agricultural products of $1,000 or more.

*Prepared by the Federation of Tax Administrators on the basis of legislation enacted at 1979 sessions.

Note: The table excludes the following state taxes: Connecticut taxes dividends at 1 to 9 percent and capital gains at 7 percent. New Hampshire taxes interest and dividends at 5 percent. Tennessee taxes dividends and interest at 6 percent; it imposes a 4 percent tax on dividends from corporations with property at least 75 percent of which is assessable for property tax in Tennessee.

(a) Figure in parentheses is the number of steps from lowest to highest tax rate.

(b) The range reported is for single persons. For joint returns, the same rates are applied to brackets ranging from $4,000 to $400,000. For heads of households, the brackets range from $2,000 to $300,000.

(c) For joint returns, the tax is twice the tax imposed on half the income.

(d) Provides for the exemption of or the imposition of lower rates on taxpayers with incomes below certain levels.

(e) Tax credits.

(f) The range reported is for single persons. For married persons, the tax is twice the tax imposed on half the income. For heads of households, brackets range from $4,500 to $20,240.

(g) Imposes a surtax of 2 percent on gross income from intangibles which exceed $5,000. A credit is allowed on taxable income up to $9,000, computed by dividing taxable income by 200.

(h) The federal tax deduction is limited: in Delaware to $300 for single persons and $600 for joint returns; in Oregon to $7,000; and in South Carolina to $500.

(i) The range reported is for single persons. For joint returns and heads of households, the same rates are applied to income brackets ranging from $1,000 to $10,000. For married persons filing separately, the income brackets range from $500 to $5,000.

(j) In addition, low-income taxpayers are allowed tax credit up to $15 for single persons and $30 for heads of households or married persons filing jointly.

(k) The range reported is for single persons. For joint returns, the tax is twice the tax imposed on half the income. Different rates and brackets apply to heads of households.

(l) In the case of joint returns, the tax is twice the tax imposed on half the income. A filing fee of $10 is imposed on each return. A credit of $15 is allowed for each personal exemption.

(m) These states by definition allow personal exemptions provided in the Internal Revenue Code. Under existing law, Idaho follows the federal code as of January 1, 1979, North Dakota as of December 31, 1976, and Utah (for purposes of personal exemptions) as of December 31, 1974. Alaska and New Mexico automatically accept amendments to the federal code.

(n) Allows $1,000 for individual taxpayers and $500 for dependents. On joint returns, each spouse may subtract the lesser of $1,000 or adjusted gross income; the minimum exemption is $500 for each spouse.

(o) No tax is imposed on persons whose net income does not exceed $5,000.

(p) A 10.75 percent rate is applied to interest and dividends (other than from savings deposits) and on net capital gains. The 5.375 percent rate applies to all other income, including earned income and interest and dividends from savings deposits. These rates include a 7.5 percent surtax.

(q) Minimum allowance; permits exemption of a spouse's earnings up to $2,000.

(r) These are the official rates and exemptions, mandated by state constitution. The actual tax is found by referring to a table that relates federal tax liability, exemptions, and filing status to amount of state tax.

(s) In addition, a permanent 10 percent surcharge is imposed.

(t) The rate is determined annually by the state board of equalization and assessment.

(u) A separate tax is levied on New York-New Jersey commuters. Taxpayers are liable only for the larger of the applicable taxes.

(v) The rate range reported is for single persons; for joint returns and heads of households, tax rates range from 0.8 percent on income not over $2,000 to 9 percent on income over $200,000. Different rates apply to married persons filing separately.

(w) Also, a 1 percent tax is imposed on net incomes over $2,000 derived from a business, trade, or profession other than as an employee. The additional tax expires January 1, 1981.

(x) The rate range shown is for single persons. For joint returns, and surviving spouses, tax rates range from 0.5 percent on the first $2,000 to 6 percent on amounts over $15,000. For heads of households, tax rates range from 0.5 percent on the first $1,500 to 6 percent on amounts over $11,250.

(y) The rate range reported is for single persons. For joint returns, rates range from 2.75 percent on income up to $1,500 to 7.75 percent on amounts over $7,500. Different rates and brackets apply to married persons filing separately.

(z) If Vermont tax liability for any taxable year exceeds Vermont tax liability determinable under federal law in effect January 1, 1967, the taxpayer will be entitled to a credit equal to the excess plus 6 percent of that amount.

(aa) The range reported is for single persons and heads of households. For joint returns the same rates are applied to brackets ranging from $4,000 to $400,000.

(ab) Seven states have statutory provisions for automatic adjustment of tax brackets or personal exemptions, as well as other features, to reflect changes in the price level. Adjustments to be made for 1980 tax years will generally not be known until the latter part of 1980. The 1979 adjustment is shown when available.

*Prepared by the Federation of Tax Administrators on the basis of legislation enacted at 1979 sessions.

⁺Figure in parentheses is number of steps in range.

(a) Plus a surcharge of 4 percent of taxable income; the state surcharge exemption follows the federal surcharge exemption.

(b) Banks and other financial institutions are subject to a license tax.

(c) Minimum tax is $200.

(d) Or 0.31 mills per dollar (maximum $100,000) of capital stock and surplus, or $50, whichever is greater.

(e) An exemption of $5,000 is allowed.

(f) Taxes capital gains at 3.08 percent.

(g) An additional tax of $10 is imposed on each return.

(h) Includes 2.85 percent personal property tax replacement tax.

(i) Consists of 3 percent basic rate plus a 3 percent supplemental tax.

(j) Fifty percent of federal income tax deductible.

(k) Plus a surtax of 2.25 percent of taxable income in excess of $25,000 (2.125% for banks).

(l) Rate includes a 14 percent surtax, as does the following: plus a tax of $2.60 per $1,000 on taxable tangible property (or net worth allocable to state, for intangible property corporations). Minimum tax of $228 including surtax. Corporations engaged exclusively in interstate or foreign commerce are taxed at 5 percent of net income and are not subject to surtax.

(m) Minimum tax is $100.

(n) Minimum tax is $50; for small business corporations, $10.

(o) Twenty-five and 27.5 percent of individual income tax rate, determined annually by state board of equalization and assessment, imposed on net taxable income.

(p) Business profits tax imposed on both corporations and unincorporated business.

(q) This is the corporation business franchise tax rate, plus a net worth tax at millage rates ranging from 2 mills to 0.2 mill; minimum tax is $250. Corporations not subject to the franchise tax are subject to a 7.25 percent income tax. Savings institutions subject to a 3 percent surtax.

(r) Minimum tax is $100.

(s) Or $250; 1.78 mills per dollar of capital; or 10 percent of 30 percent or net income plus salaries and other compensation to officers and stockholders owning more than 5 percent of the issued capital stock less $15,000 and any net loss, if any of these is greater than the tax computed on net income.

(t) Minimum tax is $250 or 1.6 mills per dollar of capital stock; for savings institutions, the minimum tax is $250 or 2 percent of interest credited to depositors in preceding year.

(u) In addition to the tax shown, imposes a privilege tax of 1 percent on income in excess of $2,000 on corporations not subject to personal property (or in lieu) taxes.

(v) Minimum tax is $50; plus an additional 2 percent tax.

(w) Or 5 mills times the value of the taxpayer's issued and outstanding shares of stock as determined according to the total value of capital surplus, undivided profits, and reserves; minimum tax $50.

(x) Minimum tax is $10.

(y) Or, for business corporations, the tax is 40 cents per $100 of corporate excess, if greater than the tax computed on net income. For banks, if a greater tax results, the alternative is $2.50 per $10,000 of capital stock; minimum tax is $100.

(z) Minimum tax is $200 per authorized location.

(aa) Minimum tax is $25.

(ab) Includes 10 percent surtax. Minimum tax is $25.

(ac) Michigan imposes a single business tax (sometimes described as a business activities tax or value added tax) of 2.35 percent on the sum of federal taxable income of the business, compensation paid to employees, dividends, interest, and royalties paid, and other items.

(ad) Minimum tax is $50.

[1] Estimated

[2] Includes interest on school debt and expenditures for summer schools, adult education, community services, and community colleges and technical institutes under the jurisdiction of local boards of education, not shown separately.

[3] Average daily attendance.

[4] Based on estimated resident population as of July 1, 1974, July 1, 1976 and July 1, 1977, from U. S. Bureau of The Census, Current Population Reports, Series P-25.

[5] Preliminary Source: U. S. Bureau of Economic Analysis, Survey of Current Business, April 1979.

[6] Total includes estimates for nonreporting States.

[7] In order to have the lowest rank equal to the number of States presented, the number 27 is omitted. Nevada and Nebraska have the same rank, 26.

(a) Uncertainty of designating these states as having a state police or highway patrol arises from ambiguity in either their organizational designations (usually "department of public safety") or their responses to whether they are responsible for both criminal and traffic matters. Each of these state agencies was formerly designated as a highway patrol. In their overall operations they probably still are, but they do have and exercise criminal investigative authority.

(b) No state law enforcement agency.

+All states have statewide air and water pollution control laws.

X — Indicates state has this program.

(a) R & D equipment classified as manufacturers' equipment and is thus eligible for tax exemption.
(b) Exemption of certain items at local or county level.
(c) A reduction, exemption, or credit on assessed valuation of some business inventories or a stipulated percentage of all inventories.
(d) Tax credit or exemption allowed for specified items or operations, usually for specified time under certain conditions.
(e) Applies only to pollution control equipment.
(f) Exempt from sales/use tax. Illinois: phased exemption; fully exempt by 1984.
(g) Does not collect excise tax.
(h) Does not tax personal income.
(i) Allowable depreciation similar to that permitted under federal laws.
(j) Credit or exemption percentage allowed for federal taxes paid.
(k) Applicable at local level only. Pennsylvania: as tangible personal property.
(l) Applicable under tax equalization law only.
(m) Exemption extends only under specified conditions: Louisiana, capital improvements; North Dakota, new construction; Oregon, only while facility under construction.
(n) Taxed only on the value of raw materials.
(o) Except for sales/use tax on materials purchased for use as an ingredient in tangible personal property for sale.
(p) Local or county option. In Virginia, for specified items.
(q) Certain items taxed at lower rates.
(r) Local option in designated redevelopment areas.
(s) Does not collect sales/use tax.
(t) Does not tax corporate or personal income.
(u) Recommended by state for adoption by municipalities.
(v) Tangible and intangible personal property not subject to ad valorem taxes.
(w) Certain materials used for specified purposes exempt from sales/use tax.
(x) Seven-year annexation or de-annexation exemption.
(y) Local governments may tax at different rates than other tangible personal property.
(z) Credit allowed for sales tax paid on energy.

[1] Includes central administrative offices and auxiliary units.

[2] Includes employment and payroll at administrative offices and auxiliary units.

[3] "Production workers" represents the average of the employment for the payroll periods ended nearest the 12th of March, May, August, and November. "All employees" represents the average of "production workers" plus all other employees for the payroll period ended nearest the 12th of March.

[4] Unadjusted for 1947; thereafter, adjusted. Unadjusted value added is obtained by subtracting cost of materials, supplies, containers, fuel, purchased electric energy, and contract work from value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by manufacture, processing, or assembly), plus (b) net change in finished goods and work-in-process inventories between beginning and end of year.

[5] Includes extensive duplication arising from shipments between establishments in the same industry classification. Comprises for all manufacturing establishments classified in an industry value of (a) products primary to the industry, (b) secondary products which are primary to other industries, (c) miscellaneous receipts such as those for contract and commission work on materials owned by others, scrap, salable refuse, repair, etc., and (d) resales, i.e. products resold in the same condition as bought.

[6] Due to changes in industry classification, 1967 data not comparable with later data.
